---

Hello, I'm Peyton Smith, a proficient Front-End Web Developer. My expertise lies in HTML, CSS, JavaScript, and React, and I have a talent for accurately translating designs into functional React components for improved interactivity. I enjoy troubleshooting bugs, optimizing sites for scalability, and working collaboratively with skilled teams to deliver exceptional results. Crafting captivating digital experiences is not just a job, it's my genuine passion. Let's work together to create something incredible!

## SKILLS

---

**Code:** Javascript, ES6, React, Node.js, Express.js, HTML5, CSS, Redux, MySQL, REST API, Git, Material UI.

**Soft Skills:** Problem-solving, Able to quickly learn new concepts, Critical thinking, Flexibility, Cooperation, Communication.

**Software:** VS Code, Postman, Beekeeper Studio, MySQL Workbench, Jira, Trello, GitHub.

## EDUCATION

---

### Austin Coding Academy, Austin — *Software Engineering Certification*

July 2022 - April 2023, Austin Tx

- Completed a rigorous web development boot camp focused on full-stack development and modern web technologies.
- Achieved the highest academic standing in the program, earning the top spot in my graduating cohort.
- Demonstrated proficiency in various technologies, including HTML, CSS, JavaScript, Node, React, and more.
- Learned mobile-first responsive web development and common best practices used in the industry.
- Built several full-stack applications and deployed those applications to servers. For example, I developed a full-stack business application with responsive, modern web components and deployed it to Netlify and Vercel.
- Collaborated with other classmates for group projects, using Trello for task management and GitHub for version control.

## Work History

---

### Chick-Fil-A, Lubbock TX — *Delivery Driver*

February 2021 - PRESENT

- Followed a delivery process using proprietary software.
- Worked with customers to provide the best experience possible.
- Saved time by routing deliveries efficiently.
- Mentored new hires on our policies, culture, and procedures.

# Projects

---

## Bar-C Kennels

<https://barclabradors.com>

- Received a list of features to implement from a third party.
- Designed and developed the application from the ground up using React.js.
- Implemented third-party APIs like Google Places and Facebook Graph.
- Engineered a back-end API to handle client data using Express and MySQL.
- Used AWS Relational Database services to host MySQL.

## Flourish

<https://candid-toffee-fe984e.netlify.app/>

- Developed the app using React, CSS, React Context, and Node.js.
- Implemented a shop page with functionality to add items to a cart.
- Created a Node.js backend to handle data processing and communication with the front end.
- Utilized the Stripe API to enable secure and seamless payment processing during checkout.
- Designed and implemented a user-friendly interface using CSS for a visually appealing and intuitive user experience.
